Test Cases Number 001

Produced by: Duke's Children

Identification code:	Login and password
Project's name:	"Purchases And Sales Record"
Description (Scope and Objectives):	The application must allow to enter the purchases and sales of a commercial store
Input variables	Enter the following field: - User and password
Normal flow of the event	1) Fill the respective field with the username and password assigned 2) Give Enter to access
Expected result:	Enter the menu of purchases and sales.
Alternate flow	Enter an incorrect username or password.
Expected alternative result:	An Error message will be displayed.
Test evaluation	
Execution date:	18/06/2020
Executed by:	Limber Gutierrez
Place of execution:	Quito
Results obtained:	The program correctly displays the purchase menu and the sales record. An error when correcting enters the system
Observations:	does not allow entering the system menu
Error severity	serious
Developer Notes	
State:	Corrected
Corrective actions:	The keyboard data entry reading has been modified to validate the correct password and you can enter the menu
Corrected by:	Jonatan Lituma

Test Cases Number 002	
Produced by: Duke's Children	
Identification code:	Search Client
